If you have any enquiries, please contact us at: sales@fentec.co.nz or 0800 002 725

HERE AT FENTEC, WE SPECIALISE
IN PROVIDING YOU WITH QUALITY,
COMPETITIVE FENCE AND GATE SYSTEMS
THAT WILL ENHANCE THE VALUE AND
SAFETY OF YOUR PROPERTY.

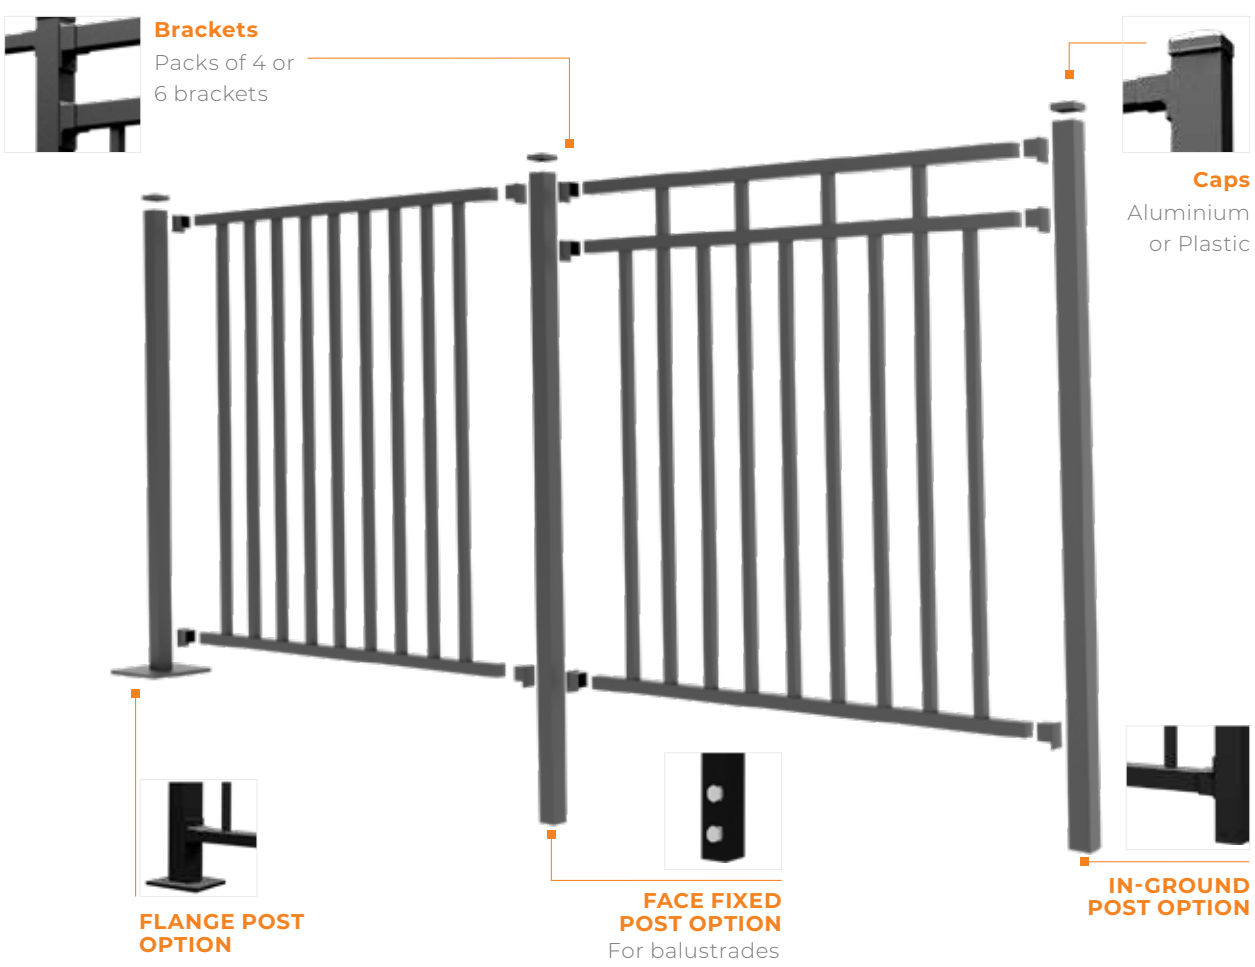

YOUR FENCE COMPONENTS

ALUMINIUM

Strong and Durable yet light in weight – it can provide the strength of steel with one third of the weight. Aluminium also has an innate resistance to atmospheric conditions and coupled with a powder-coated finish means that rust will never be a problem.

Strong Welded Construction - All Fentec aluminium gates and fences are welded to ensure strength and durability.

Powder-coated Finish - The powder coated finish coupled with the natural properties of aluminium means that you will never have problems with rust.

SAFETY FROM FALLING

A fence or barrier is required where people can fall from a height of one meter or more including retaining walls, decks & balconies.

Our Balustrade range meets the **NZ building code** when installed in accordance with Fentec Producer Statements. Contact our technical support team for assistance.

STEEL

Strong and Durable - New Zealand's harsh climate calls for the strength and durability of COLORBOND® steel fencing. Made to withstand heat, wind and the test of time, your Fentec Steel fence lives on and on while maintaining its appearance year after year.

Strong and durable. Easy to maintain

Simple Installation - Fentec Steel Fencing systems are designed to be easy and quick to install and for many DIY customers it is the go. Simple; we supply a complete kit set ready to go, with installation guides and free support from our technical support office to get you underway. We make it hassle-free & cost-effective.

STEEL POST & RAIL | MINICLT PLANKS

STEEL POST & RAILS Fentec steel post & rails provides strength to this superior slim profile fence option preventing twisting and warping over time.

MINICLT PLANKS MiniCLT by Laminata is a Cross Laminated Timber plank developed using the latest high performance European glue lamination technology. Cross Laminated Timber construction provides strength by gluing three layers of timber, with the middle layer at right angles to the outer layers.

NOTE: MiniCLT Planks are supplied by Laminata - laminata.co.nz

STEEL GATE FRAME

The best way to keep your gate strong and straight for years is to use a steel gate frame. Constructed from hot-dip galvanised steel this frame can handle anything. Attach your own timber, iron or cladding to this frame to form a robust gate that will match in with its surroundings.
