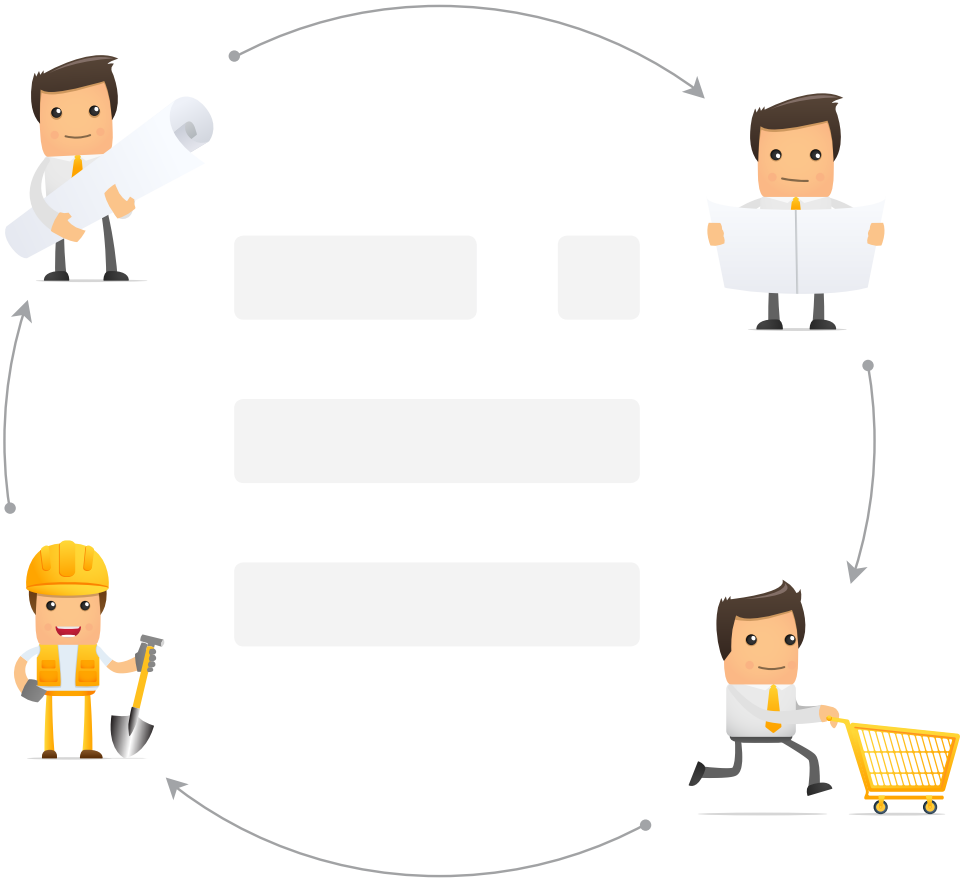
GATES & FENCES IN 4 EASY STEPS

1 MY PROJECT

- Think about what's important for the finished project, privacy, security etc
- Sketch a layout plan of the fence and measurements (see page 35)
- Make sure you note the locations of any gates on your plan

2 MY OPTIONS

- Take time to consider all your options and to select the right product for you
- Visit **fentec.co.nz** for ideas
- Make sure you check out any local council restrictions on fencing & gates



3 MY LOCAL STORE

- Identify your local Fentec stockist - see **fentec.co.nz** for a store near you
- Take your sketch plan and wish-list into the store and they will provide pricing and delivery times for your project
- Make your purchase for your selected product and collect your goods

4 INSTALLING MY GATES & FENCES

- Check you have all the materials you need to complete your project
- Visit **fentec.co.nz** to get HOW-TO-INSTALL guides
- Build your fence, install your gates – congratulations project completed!

ALUMINIUM

Strong and Durable yet light in weight – it can provide the strength of steel with one third of the weight. Aluminium also has an innate resistance to atmospheric conditions and coupled with a powder-coated finish means that rust will never be a problem.

Strong Welded Construction - All Fentec aluminium gates and fences are welded to ensure strength and durability.

Powder-coated Finish - The powder coated finish coupled with the natural properties of aluminium means that you will never have problems with rust.

SAFETY FROM FALLING

A fence or barrier is required where people can fall from a height of one meter or more including retaining walls, decks & balconies.

Our Balustrade range meets the NZ building code when installed in accordance with Fentec Producer Statements. Contact our technical support team for assistance.

CLADDING IDEAS

COLOURSTEEL IRON

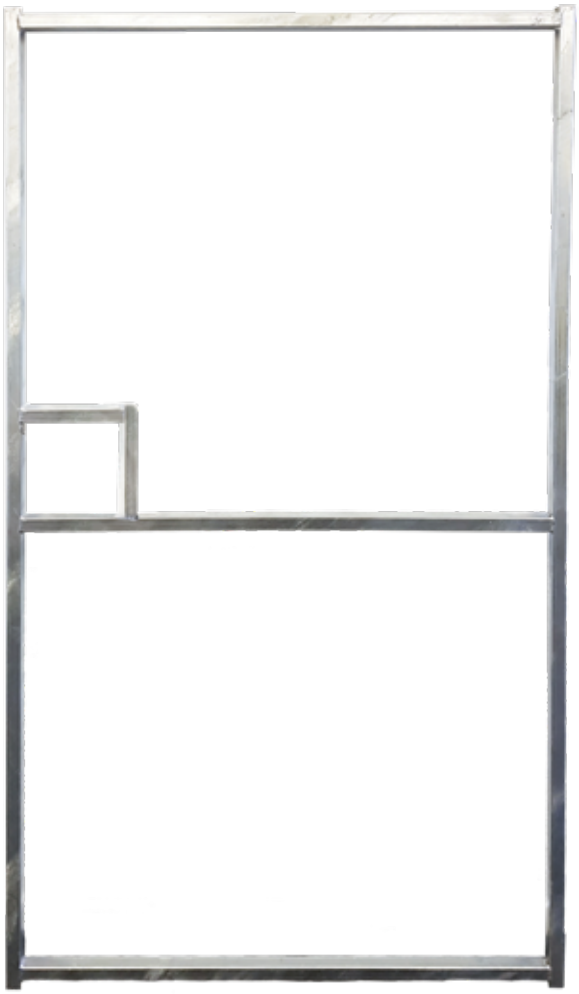
PALING TIMBER

HORIZONTAL SLAT TIMBER

STEEL GATE FRAME

The best way to keep you gate strong and straight for years is to use a steel gate frame. Constructed from hot-dip galvanised steel this frame can handle anything.

Attach your own timber, iron or cladding to this frame to form a robust gate that will match in with its surroundings.



STEEL GATE FRAME HOT DIP GALVANIZED

CUT OUT FOR LATCHING

PRODUCT CODE	FSGFSG1795	PROFILE	25mm x 25mm
GATE FRAME HEIGHT	1700mm	FINISH	Hot dip galvanised
GATE FRAME WIDTH	950mm		

TIMBER

Treated Radiata Pine H3 - Highly resistant to the weather in New Zealand and especially resistant to rot, providing years of trouble free use in outdoor situations.

Kiln-Dried Timber - Kiln-dried timber produces a consistent of dryness throughout the timber to prevent warping or twisting of the gate once installed.

Waterproof Structural Adhesives - Longevity is further guaranteed with the use of quality waterproof adhesives used in all joining processes.

Stainless Steel Fastenings - Only stainless steel fastening (rust free) are used on our gates.

MANOR

THE STATELY CHARACTER of the manor design makes this one of our most popular designs. Its curved top rail gives an inviting atmosphere to any entranceway.
